Gears Of War: E-Day

By EGS Sugarmama V

Just in two days Gears of War: E-Day will be released on Xbox as well as game pass.

This game is a third-person shooter game made up by The Coalition and People Can Fly then published by Xbox Studios. This is the 6th Gears of War game to be released.

What makes this one different is that they have made improvements on the movement with fluid sliding and jumping. As well as returning to a story about Marcus and Dom during the initial locusts outbreak.

Gears Of War E-day also added more tactical advantages by going prone during the game. As well as adrenaline injectors to heal you and a sonic disruptor to stun nearby enemies.

Another way they improved the game was by adding a 12 player horde siege. Which are multiple squads fighting across the same massive map.

Remember this game only comes out on Xbox in two days on October 6, 2026. Xbox players is this a game that your looking forward to? Tune in next time on what new games are coming out on your console and thanks for reading!!
